Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

The prior art fails to teach methods and systems having systolic and diastolic synchronization with pulse sequences including a magnetic gradient flow pulse spatially oriented in the same direction as a phase encoding magnetic gradient pulse and processing the acquired data with image subtraction.

The prior art previously applied fails to teach these features as described by the Applicant on pages 12 and 13 of the Remarks filed May 19, 2009. U.S. Patent No. 5,853,365, issued to Yamagata, teaches that "the flow encoding pulse is applied in [any of] a slice direction, a phase-encoding direction, or a read-out direction set as magnetic field application directions in the magnetic resonance imaging (column 3, lines 11-16). However, Yamagata fails to teach any other claim limitations and lacks motivation to be combined with the previously cited prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to JAMES KISH whose telephone number is (571)272-5554. The examiner can normally be reached on 8:30 - 5:00 ~ Mon. - Fri..
